

Drinking water quality monitoring at your fingertips

MAPGRAPH Drinking Water Quality

MAPGRAPH Drinking Water provides safe and efficient drinking water quality management. It is a state-of-the-art cloud-based software application offering continuous access to all vital water quality data. Documentation and reporting of drinking water data is handled in accordance with national standards and regulations.

MAPGRAPH is a cost-effective Software-as-a-Service (SaaS) solution - easy to implement and easy to use. By adding MAPGRAPH Customer Portal consumers can access the water quality at their location from a map embedded in the water suppliers' website.
